

FEATURED HIKE

Glastowbury

Enjoy lake views and natural rock formations on this easy trail. Outer loop is only 0.91 miles. You can make the hike shorter by taking the halfway shortcut for a 0.5-mile hike.

7 Bridges

An easy 2-mile hike through the woods with, you guessed it, seven bridges! Walk beside and cross over several creeks during the hike. Enjoy the scenery from a bench atop a large rock formation. Parking at the Methodist church on Westchester Drive is allowed.

Overlook

This is a scenic 1.9-mile loop hike beside Daddy's Creek. No matter the season, you are sure to observe a variety of flora and fauna native to the Plateau. Hike counterclockwise to enjoy the creek first. On the return you will encounter unique bridges and spectacular rock steps all built by hand by dedicated volunteers. Take a moment to enjoy the overlook of Daddy's Creek right at the trailhead.

North Trails

These trails can be combined to make hikes of various lengths. Trails can also be hiked as an "in and out," retracing your steps back to the trailhead. North Trails provide more elevation change, making them a bit more challenging than the trails south of Peavine Road. Notable features to look for are a set of 117 rock steps on Hemlock; mountain laurel in late May and early June on McGinnis; rock formations on McGinnis, Canyon, and Good Samaritan; and a walk along a creek on Rotherham and Hemlock. See map on opposite side for details.

Central Trails

Over 5.5 miles of paved walking and biking paths can be found in the middle of the Glade. Sidewalks extend north to the North Trails and up Stonehenge Drive to connect with the Stonehenge trail. South from the Wyndham registration building, the path leads to mini-golf, the library, and the Art Guild. From there, it is possible to hike to the 7 Bridges trail as well.

FUN HIKES

Welcome to our trail system!

This handy, portable guide can get you started on your Glade trail adventures. There are over 19 miles of natural surface trails and nearly six miles of paved walking paths. Included in this brochure are several hikes ranging from easy to strenuous, from one to seven miles in length. A comprehensive map is available at The Center.

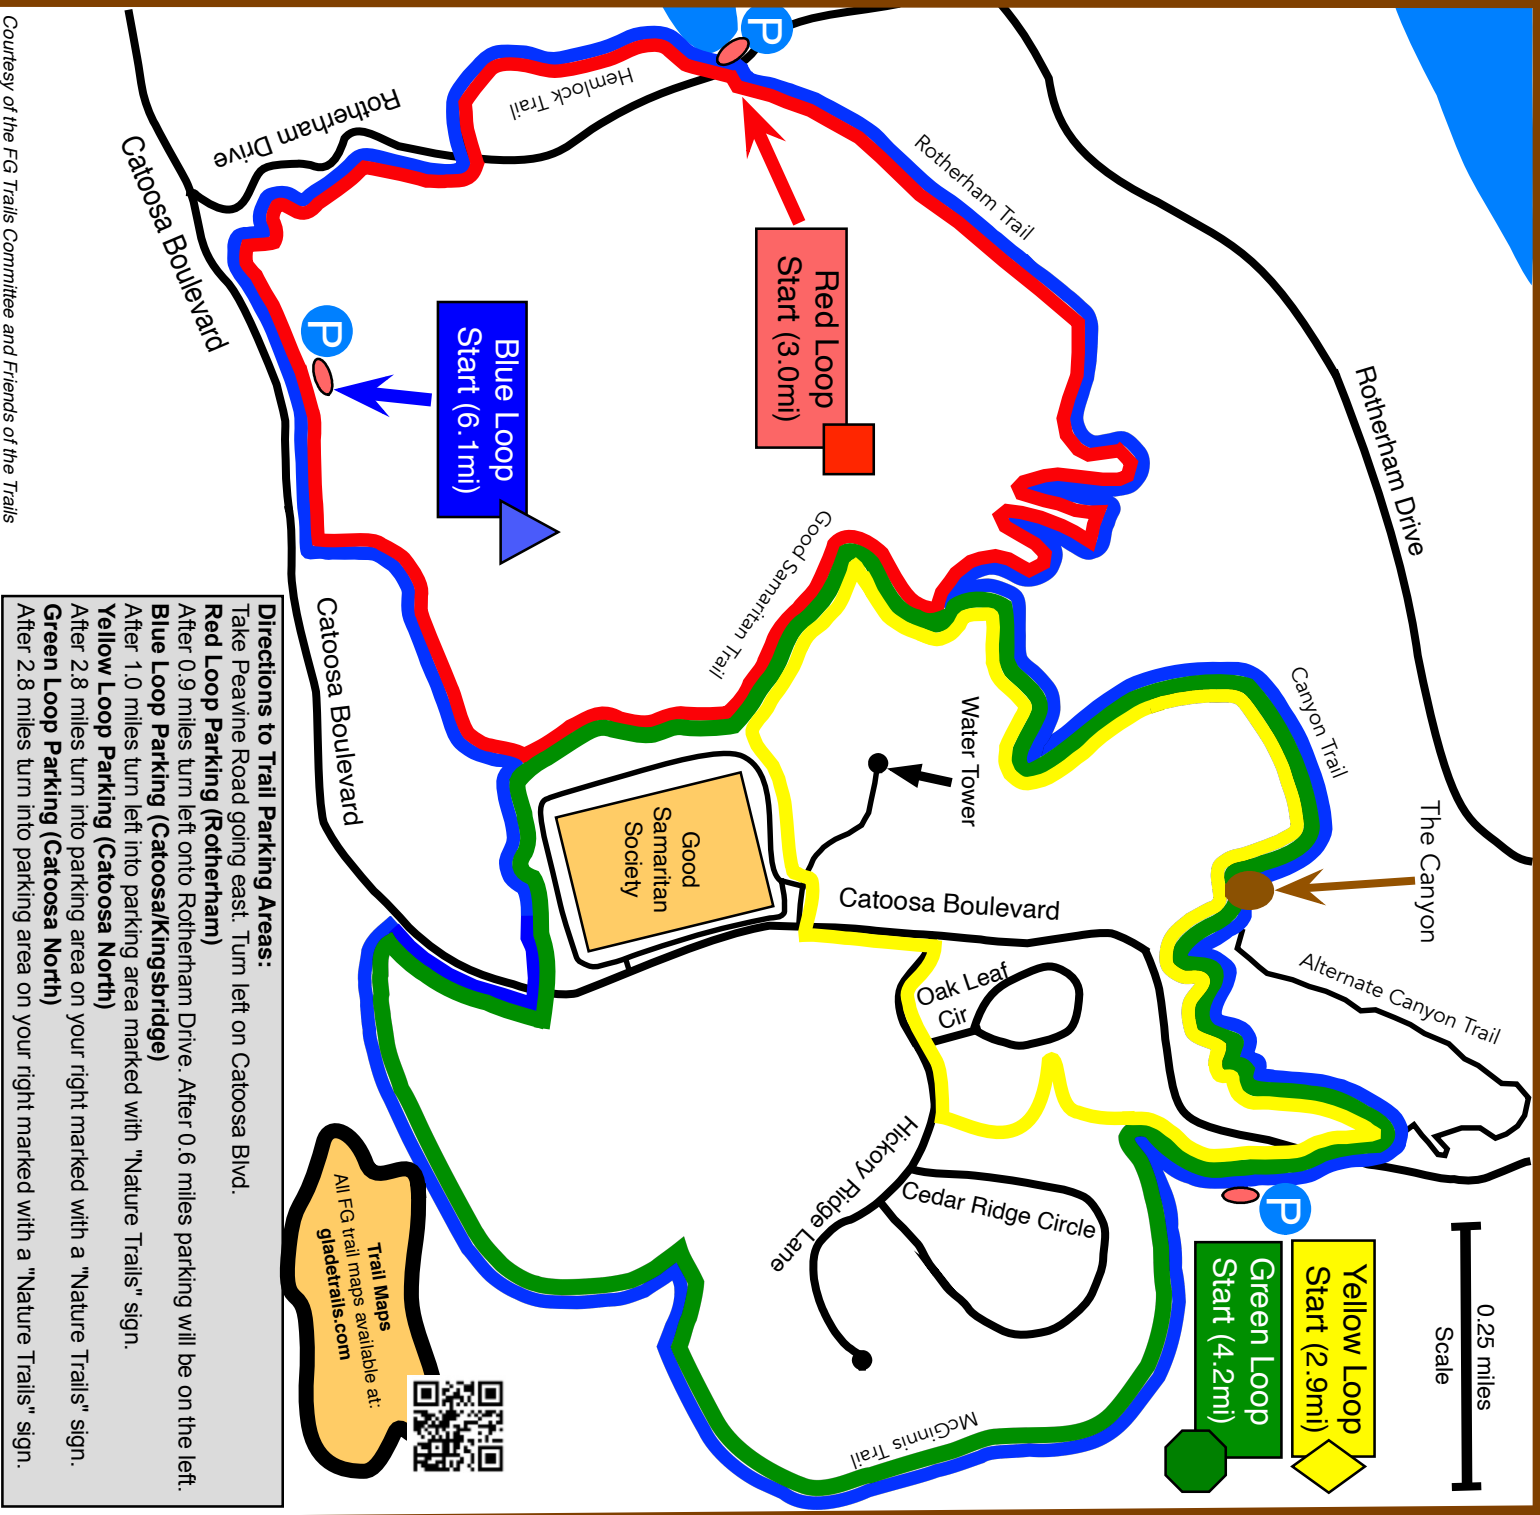

Hike Safe

Always carry water. Leave extra water in the car. Use bug spray. Wear a hat. Let someone know where you went hiking and when you expect to return. 911 markers are on posts about every quarter mile.
